

Magvast concrete system junction boxes

CD80R Junction box round with tape Ø 16/19 mm

- Can be used in wide boarded floors.
- Distance from the underside of the conduit entries to the open side of the box: 60 mm.
- The penetration of concrete water into conduit entries is prevented by adhesive tape.
- Protective cover (Art. No. AT4818) and adhesive protective cover (Art. No. AT4850) available separately.
- Suitable covers for mounting: Art. no. AT5010 and AT5011.

Article no:	AT1031
EAN:	8712259000114
Halogen free	Yes
Amount Packaging	54 st.
Conduit diameter	16 / 19 mm
Ø circular saw	80 mm
Outer size	85 mm
Dispatch	54

Attema's Magvast® concrete construction system is used mainly in concrete factories, but also on building sites. Magvast® works with magnets that are clamped into the boxes to prevent concrete water from entering the boxes.

After measuring, the magnets are placed on which the box is then placed. After the formwork is removed, the magnet remains behind on the steel table or formwork, after which it can be removed and reused. Magvast® is then ready for the next cycle. It is a flexible system that does not damage the formwork.

Attema has magnets for various types of boxes in its range. Magnets have a high clamping force (>100 kg).

Suitable for steel formwork.

Attached without drilling, so no damage to the formwork.
